### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 9 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 fails to further limit independent claim 1 since it claims an element previously claimed in the independent claim.

In claim 9, there is no antecedent basis for the "heated holding tank". If this element is the same as the previously claimed holding tank, then there should be recited some structure for providing the heating of the tank.

Claim 20 appears to be incomplete. At line 4 there it is recited that the water tank is in communication with "both a coffee filter holder". But, there is no recitation of an additional element in which the water tank is in communication with.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Bunn et al.

Art Unit: 1761

There is disclosed in Bunn an apparatus for making a single serving of brewed coffee and powder mix beverage, comprising: a water tank 76 and heater 93; a holding tank 24; a coffee filter holder 52 and filter 160; a dry mix hopper 34; a whipping chamber 46; and controls 32.

In regards to claims 9-11, the phrase "adapted to" and the subsequent method steps fails to positively define any structural limitations.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bunn et al.

Bunn discloses all of the claimed subject matter except for the recited height of the apparatus. It would have been an obvious matter of design choice to construct the apparatus of the claimed size, since applicant has not disclosed that the recited size solves any stated problem and it appears that the invention would perform equally well with the size disclosed in Bunn.

***Allowable Subject Matter***

Claims 12-19 are allowed.

***Conclusion***

Art Unit: 1761

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Locati and Scheer et al. are cited for their disclosure of the state of the art.
